Who: Managers
What: Drivers automatically assigned.
Why: To decrease the time in between receiving the order and the delivery to the customer.

As a \<user\> I want \<function\> so that \<value\>.

User Stories

1. As a manager I want to assign delivery drivers to a certain ticket automatically when it is received from a list of delivery drivers available because it is good to reduce time between customers receiving their groceries and delivering them.
2. As a customer I want to be able to cancel my order so that I get my money back in the event that I overspend.
3. As a customer, I would like to have more than 1 payment option this way if I am low on cash, I can use credit/debit cards or checks instead or at the same time.
4. As an employee, I want to be able to have a secondary digital receipt because it makes it easier for the order to be brought up later if it has to be cancelled.
5. As the delivery driver, I want to be able to track the destination without having to deal with traffic because the sooner the customer gets their items, the more satisfied they will be with the delivery service.
6. As a customer, I would like to update my payment Information to add a second credit card.
7. As an employee, I would like to be able to substitute for items not in stock in order to satisfy customers.
8. As a delivery driver, I need to have easy access to where the destination is told to me so that I do not need to spend much time looking for the information.
9. As an employee, I want to be able to see which items are in stock so that I can update them if necessary.
10. As a customer, I would like to search for a product to make my online shopping faster and efficient.
11. As a product supplier, I want to be able to have enough items for employees so they can bring them to their grocery store if they start to run out of stock.
12. As a manager, I want to view sales analytics to prepare for busy hours.
13. As a customer, I want to check the status of my delivery order to understand when to expect it
14. As a customer, I would like to be notified when specified items are available so i can purchase them.
15. As a customer, I would like to be able to add a coupon or discount to my order so that I don't have to pay the full price.

16. As a manager, I would like to hire the right employees for the job who can work with online systems so our business can prosper with online orders.
17. As an employee, I need to be able to order replacements for out of stock items so that the store does not eventually run out of items.
18. As a customer, I want to be able to view my order history so that I can order them again.
19. As a manager, I would like to be able to train every employee with the online service this way all of our employees have the right amount of experience to use it.
